
Acoustic Features

- 52 **Investigations on Features for Log-Linear Acoustic Models in Continuous Speech Recognition**
(S. Wiesler, M. Nußbaum-Thom, Georg Heigold, Ralf Schlüter, Hermann Ney)
- 58 **Leveraging Speech Production Knowledge for Improved Speech Recognition**
(Abhijeet Sangwan, John H.L. Hansen)
- 64 **Optimal Quantization and Bit Allocation for Compressing Large Discriminative Feature Space Transforms**
(Etienne Marcheret, Vaibhava Goel, Peder A. Olsen)
- 70 **Using Temporal Information for Improving Articulatory-Acoustic Feature Classification**
(Barbara Schuppler, Joost van Doremalen, Odette Scharenborg, Bert Cranen, Lou Boves)
- 76 **Log-Linear Framework for Linear Feature Transformations in Speech Recognition**
(Muhammad Ali Tahir, Georg Heigold, Christian Plahl, Ralf Schlüter, Hermann Ney)
- 82 **Multi-View Learning of Acoustic Features for Speaker Recognition**
(Karen Livescu, Mark Stoehr)
- 87 **Large-Margin Feature Adaptation for Automatic Speech Recognition**
(Chih-Chieh Cheng, Fei Sha, Lawrence K. Saul)
- 93 **Articulatory Feature Detection with Support Vector Machines for Integration into ASR and Phone Recognition**
(Upendra V. Chaudhari, Michael Picheny)
- 99 **Transition Features for CRF-Based Speech Recognition and Boundary Detection**
(Spiros Dimopoulos, Eric Fosler-Lussier, Chin-Hui Lee, Alexandros Potamianos)
- 103 **Short-Time Instantaneous Frequency and Bandwidth Features for Speech Recognition**
(Pirros Tsiakoulis, Alexandros Potamianos, Dimitrios Dimitriadis)
