

Nicolò Cesa-Bianchi is professor of Computer Science at the University of Milano, Italy. He is Action editor for Machine Learning Journal and for the Journal of Machine Learning Research. He is also former President of the Association for Computational Learning. His main research interests: are learning theory, game-theoretic learning and applied machine learning (text categorization, statistical machine translation, bioinformatics). He is co-author with Gabor Lugosi of the monography "Prediction, Learning and Games" (Cambridge Univ. Press, 2006).
